

# Quartz®

# Explosion proof valve monitoring

The Quartz is available in explosionproof (QX), nonincendive, intrinsically safe (QN), and general purpose (QG) versions. The robust epoxy-coated anodized aluminum construction, and optional stainless steel version, makes this platform extremely durable and well-suited for use in corrosive, heavy washdown environments.

Options may be selected to accommodate most applications.

## The Quartz series

The StoneL Quartz series is durable, corrosion-resistant, and versatile, making it ideal for most of your process valve monitoring requirements.

#### **Enclosures optimized for environment**

**QX**: Explosionproof, water tight and corrosion-resistant enclosure is approved for use in Div. 1/Zone 1 hazardous areas. Available options include stainless steel and epoxy-coated anodized aluminum.

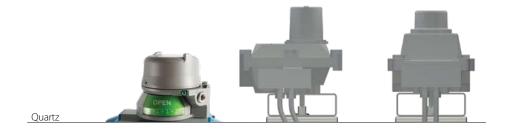

**QN**: Nonincendive is approved for Div. 2/Zone 2 hazardous environments with proximity sensors using a clear cover. Intrinsically safe NAMUR sensors or passive switches are available for Div. 1/Zone 0 applications.

**QG**: General purpose features a clear Lexan® cover with mechanical switches. All enclosures are Type 4, 4x, and 6.

#### Save space with low profile design

Clearance above the actuator is critical in complex piping systems. Quartz boldly displays valve position and encloses all electrical components in an explosion proof compartment with less than 5" clearance requirement.

### **Features**

#### 1. Enclosures optimized for environment

Available in three enclosure styles suitable for use in various process environment areas.

#### 2. Rapid enclosure access

Screw-on cover allows quick enclosure access, saving you valuable maintenance and set-up time. The cover provides a vaportight seal and allows entry to internal components in less than five seconds.

#### 3. Faster wiring

Pre-wired and labeled terminal strip enables quick, convenient attachment of field wires.

#### 4. Wide variety of switching & communication

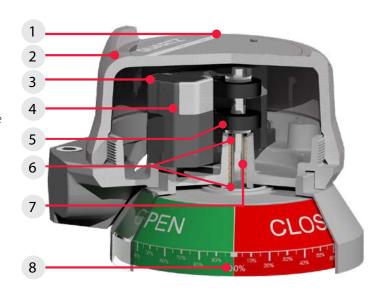

Switching options include dual module sensors and communication, Maxx-Guard proximity switches, and mechanical switches. Continuous signal output is available in a 4-20 mA position transmitter.

#### 5. Quick set cams are easy to adjust

Touch and tune switch settings allow you to make adjustments in seconds without the use of tools

#### 6. Dual shaft o-ring seals eliminate corrosion

Top inner and bottom outer shaft o-rings seal the drive bushing from both external corrosives and internal contaminants that enter the enclosure

#### 7. Special drive bushing assures long cycle life

The oil impregnated bronze bushing maintains smooth operation and eliminates the potential for shaft seizure due to actuator shaft eccentricity.

#### 8. Bold space saving visual indication

Visual indicator offers excellent viewability without sacrificing accessibility or adding to space requirements. Indicators are also available with continuous percentage or three-way indication. (See page 51)

#### Wide variety of switch/sensor functions

A wide variety of switch/sensor communications and position transmitters may be selected for the Quartz series. Options include 2, 4 or 6 mechanical or proximity switches, position transmitters with or without switches, and the StoneL dual module with two SST or two

Proximity switches

NAMUR sensors or AS-Interface, DeviceNet™ or Foundation Fieldbus communication capabilities.

Mechanical switches

#### **Speed installation with LED indication**

StoneL's coordinated visual indicator and LEDs give you an extra measure of safety and increased convenience during plant start-up and operation. Green visual indication and green LED means the valve is open and the computer circuit is properly operating. Red

visual indication and red LED means the valve is closed and the computer is properly matched. All systems are functioning properly.

#### Eliminate seal fittings in Division 1 and 2 areas

FMus ratings certify the Quartz QX series with proximity switches for use without seal fittings in all hazardous areas. By passing special pressure piling tests, the all aluminum enclosure was certified for this elite distinction. Now, a time-consuming procedure can be safely eliminated in Division 1 and Division 2 areas.

#### **Consolidate your components** and minimize costs

The Quartz design offers up to three conduit entries with extra wire terminations. By terminating solenoid valves in the switch enclosure, significant savings are realized by eliminating a junction box, wiring, conduit materials, and labor.

### Mounting kits Kits may be ordered in 316 stainless steel. Consult StoneL factory for details.

#### **Sealed mounting kit**

Mounting to standard actuators is achieved with a bold visual indicator and sealed mounting system. Sealed mounting is exclusive with extended visual indicator option N. Adaptor plate is epoxy-coated anodized aluminum. All fasterners and couplings are stainless steel.

- Direct mount to actuators with VDI/VDE 3845 interface.
- · Tolerant to vibration and mechanical stress.
- Prevents contamination and icing in coupling area.
- Available for all VDI/VDE 3845 (NAMUR) mounting configurations and most quarter-turn actuators.

#### **Quarter-turn actuators**

Low profile convenient mounting systems are readily available in stainless steel for most standard actuators.

#### **Manual valves**

Proper fit and operation is assured with Stonel's custom designs for each manual valve. Hundreds of unique mounting systems have been designed and fabricated for manually operated valves.

#### **Positioners**

Quartz position transmitter and switches may be retrofitted directly to most positioners. 4-20 feedback may be provided on simple pneumatic positioners.

#### **Linear operators**

Precision ball joint connections attach the Quartz to valve travel stems. Stroke lengths ranging from 20 mm to 150 mm (¾" to 6") may be easily accommodated.

**40** | Valve communication & control

### Quartz stainless steel option

#### For the most challenging environments

The explosion proof Quartz for process valve monitoring is available with a 316 stainless steel enclosure that is extremely durable and well-suited for use in corrosive, heavy washdown and high seas environments. A broad range of switching, position transmitters and communication options

may be selected to accommodate most applications. You can attach the Quartz to quarter-turn actuators, manual operators, linear operators, and positioners using readily available stainless steel mounting systems.

#### Position transmitter

#### 4-20 mA position transmitter

Position transmitters provide a precise 4-20 mA signal on a twowire DC loop. Control valves and dampers are accurately monitored through their range of travel offering assurance of exact valve position at all times. Several function options are available making it easy to find the correct product that fits your desired application. Choose a position transmitter with a standard potentiometer (5\_), a vibration proof, high-performance potentiometer (7\_), or the innovative non-contact magnetic resistive (mag res) digital transmitter (T\_).

#### **Digital transmitter**

The digital transmitter utilizes an innovative non-contact magnetic sensor. The module features easy push button calibration to reduce set-up and commissioning time. With the bold red/green LED indication, the unit is visible from a distance and the calibration diagnostic LED indications confirm set up is valid. The position transmitter module housed with the Quartz platform is fully sealed and potted, providing reliable operation and outstanding vibration tolerance in tough applications.

### Sensors and communications

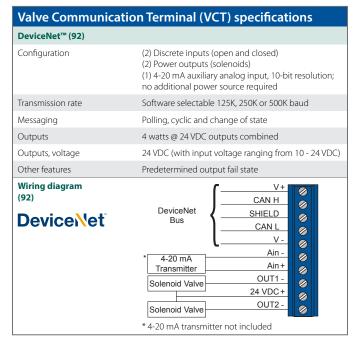

#### **Dual module system**

The Quartz series is available with the dual module in its various configurations. Two solid state sensors and/or communications and other electronics are sealed in for the ultimate in reliability and convenience. All dual module versions have a five year warranty.

### Sensors and switches

#### **Maxx-Guard proximity switch**

Maxx-Guard hermetically-sealed switches are suitable for computer input circuits and general purpose applications. SPDT tungsten contacts are designed for 125 VAC computer inputs and 240 VAC moderate power applications. SPDT rhodium contacts are suitable for both 24 VDC and 120 VAC computer inputs. SPST ruthenium contacts are ideal for either 24 VDC or 125 VAC low power computer inputs.

### Sensors and switches

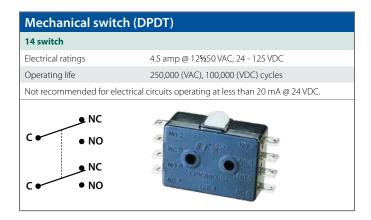

#### **Mechanical switch (SPDT)**

Low cost single-pole double-throw mechanical switches with silver contacts are recommended for high power 125 VAC applications. Gold contacts may be used in 24 VDC computer input applications when cycle life does not exceed 100,000 operations.

Mechanical switch (S	PDT)
Silver contacts (_V switch)	
Electrical ratings	10 amp @ 12 <b>5</b> ⁄250 VAC 0.5 amp @ 125 VDC

#### **Mechanical switch (DPDT)**

Double-pole double-throw mechanical switches enable two electrical circuits to be activated simultaneously. Each switch circuit is electrically isolated from the other. As with standard silver contacts, DPDT switches are designed to operate in high-power applications.

### **SST** switching sensor

Solid state SST proximity sensors are ideal for use in AC and DC computer input circuits.

SST switching sensor	rs

Specifications					
Materials of construction					
Housing & cover	Epoxy-coated anodized marine grade aluminum or stainless steel				
Clear cover & indicator	Lexan® polycarbonate				
Elastomer seals	Buna-N; optional EPDM				
Drive shaft	Stainless steel				
Drive bushing	Bronze, oil impregnated				
Fasteners	Stainless steel				
Temperature ratings					
Mechanical components	-40° C to 80° C (-40° F to 176° F)				
Dual modules	-40° C to 80° C (-40° F to 176° F)				
Maxx-Guard & SST	-40° C to 80° C (-40° F to 176° F)				
Warranty					
Mechanical components	Two years				
SST & dual modules	Five years				
Lexan® is a registered trademar	k of General Electric Corporation.				

Ratings		
Explosionproof (Ex d, Zone 1 or Class I and II, Div. 1)	QX models*	
Nonincendive (Class I and II, Div. 2)	QN models*	
Intrinsically safe (Ex ia, Zone 0 or Class I and II, Div. 1)	Functions 44, 45, 93, _A, _J, _M and _N*	
Enclosure protection		
Type 4, 4X and 6	All models	
Ingress Protection 67	All models	
Approvals*	See StoneL.com/approvals	
* Only models listed on StoneL'	s official website are approved per specific rating.	

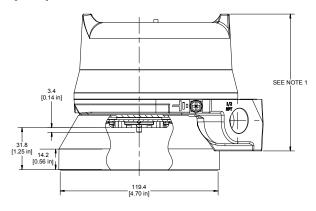

#### Dimensions

#### **Output option "S" - Short visual indicator**

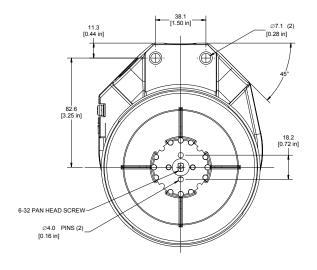

#### Output option "N" - Extended visual indicator

#### NOTE 1

Cover height varies based on model number. Dual module and 2-switch models use short covers.

- Short cover = 102 mm [4.0"]
- Medium cover = 123.4 mm [4.86"]
- Tall cover = 155.4 mm [6.12"]
